

Packing services

John Pipe International aims to provide a very complete service, broken down into three areas:

Export Packing – A commercial cost effective service to protect items literally from the end of your production line (on your site if required) until they arrive to be used anywhere in the world by any mode of transit. We have “on tap” a full range of in-house expertise. We can pack (nearly) anything so that it arrives ready for use in perfect condition.

Case-making – Proven over 40 years, we have our own designs of cartons, close boarded cases and open slatted crates. We can supply any quantity to any design. (See the case design page)

Defence Packing – Providing a military solution to packaging problems – including provision of packs, packing, barcode labelling etc. We are fully approved by the Defence Packaging Authority (DPkgA) with DR14 (design capability accreditation).
